Deadline for the next issue is Tuesday in two weeks. Post your contribution in time !!

02-08-1983

Hallo, lieber Leser !

Nun ist es also endlich auf Euerem Schreibtisch gelandet:

RADIOTELEX mit seiner ersten Ausgabe ! Nach anfänglichen Schwierigkeiten (ursprünglich sollte der Start am 19.Juli sein) kann begonnen werden. Wir bitten daher alle diejenigen Schreiber um Nachsicht, die sehr schnell nach Aussendung der ersten Promo-spots via R.Apollo und BBMS reagiert haben und mit Ungeduld auf Ihr Probeexemplar warten. Natürlich hoffen wir, daß Euch unser Bulletin gefällt und daß Ihr alle Abonnenten werdet; wir werden versuchen, Euch dafür als Gegenleistung aktuelle FR-Informationen zu bieten, schon durch die 14-tägige Erscheinungsweise bedingt. Am besten wäre es natürlich, wenn Ihr Euere Beobachtungen aufschreibt und an uns schickt: Je mehr Informationsquellen vorhanden sind, desto besser können inhaltlich richtige Meldungen zustande kommen. Auf jeden Fall erst einmal : VIELEN DANK FÜR EUER INTERESSE. Viel Spaß !

+++

ATTENTION : For our English-language readers !

Thank you for your interest in RADIOTELEX ! After several starting-difficulties (originally, the first issue should have appeared on July 19) this is our first mag we are offering to all who are interested in FR. It is a bit difficult to manage to make all news-items understandable to every reader, but we'll try and start some 'multilingual' (hi...) log-section together with news items which can be understood by everyone. However, if there are very many subscribers to come the following months who would prefer an 'all-English' issue, we have to think about publishing also a translated version of the German RADIOTELEX. Tell us what you think about this ! Anyway : THANKS AGAIN FOR YOUR INTEREST. Of course, your participation is wanted (better: needed) for an informative magazine. Happy reading !

.....

NEWS

- Superstation Helena soll eine neue Gemeinschaftsstation zwischen DJ's der Stationen R.Apollo, Eastcoast Commercial, BRI und UK-GM werden. Geplanter Start ist im Herbst dieses Jahres und der Sendeplan sieht alle 3 Monate eine Sendung vor, wobei sich oben genannte Stationen mit der Ausstrahlung abwechseln. Adresse: 32 Victoria Rd, Salisbury, Wiltshire, U.K. (combination-project)
- Die wahrscheinliche Adresse für das R.Nova aus Den Haag ist : P.O.Box 85, 4527 ZH Sluis, NL. (Attention: this is only the probable address !)
- VOTL, Voice of the Leek , plant seine zweite Sendung in diesem Jahr am August Bank Holiday (31.August 1983). Die Sendung kommt auch diesmal wieder aus Wales. adr: P.O.Box 319, Edenbridge, Kent, U.K.
- BBMS, 145 Fleet Street, London, EC4, verschickt jetzt neue, gedruckte QSL-Karten. Ebenfalls neu ist der Sendeplan: 1000-1300 auf 7325 kHz. Die nächste Sendung kommt voraussichtlich am 14.08.1983. Der deutsche DJ ist John West, der Betreiber Gary Stevens.
- R.49, will Sendezeit von R.Delmare mieten und dann Sonnabends 'on the air' sein. (R.49 plans to hire time from R.Delmare to operate on Saturdays)
- Die nächste Sendung von R.Apollo wird in 2-3 Wochen stattfinden, und zwar als 'co-site-project' mit R.48 wie schon einmal.
(Next Apollo/R.48 - broadcast in 2-3 weeks)

ANZEIGEN

- R.49 sucht einen deutschen DJ. Interessenten wenden sich an : R.49, c/o 3 Rosewarne Cottages, Rosewarne Downs, Camborne, Cornwall, U.K.
- Auch R.Enterprise aus Irland sucht einen DJ, der jede oder alle 2 Wochen deutsche Programme machen kann. Adresse: P.O.Box 1190, Dublin.

So, das war's auch schon für heute. Vielen Dank für's Lesen und bitte beteiligt Euch, damit viele Infos die nächste Ausgabe füllen. Bis dann
 Bye for now and please write in for the next issue!

16-08-1983

Hallo !

Zwei Wochen sind vergangen, Zeit, RADIOTELEX wieder herauszubringen. Die Resonanz auf dieses neue Magazin in dieser Zeit ist als relativ gut zu bezeichnen : Bisher gibt es ca. 20 Interessenten, von denen 4 die Absicht haben, Abonnementsinhaber zu werden. Nun gut, so weit in eigener Sache.

Logs und Nachrichten gingen erfreulicherweise recht zahlreich ein, ein Grund optimistisch zu sein ! Dank dieser Mitarbeit wurden dann auch gleich 2 Fehler in der letzten Ausgabe aufgeklärt. Nämlich :

- In den Logs vom 24-07-83 wurde Capital Radio aus Irland auf die Frequenz 6280 kHz verfrachtet, was natürlich nicht richtig ist, da Westside Radio hier aktiv ist. Capital R., das die Adresse North Street, Swords, Co. Dublin benutzt, sendet auf 6268 kHz.
- Eine wichtige Korrektur betrifft den Bank Holiday in Großbritannien: Er ist am 29. August 1983 (Montag) und nicht am 31. wie gemeldet.

Weiterhin wurde entschieden, RADIOTELEX nicht in einem Deutsch/English Gemisch erscheinen zu lassen, sondern getrennt, d.h. eine deutsche Ausgabe, sowie deren englische Übersetzung. Gut ?!

So, also erstmal los mit den Logs (etwas anders geordnet als das letzte Mal ...) :

c7-08-1983

kHz	+Station	+Zeit (GMT)	+Sprache, Bemerkungen	+S-Wert

Desweiteren gibt's noch eine Beobachtung von der MITTELWELLE :

963	R.Caroline/IW !!!	2155	Testton	5 !
-----	-------------------	------	---------	-----

Nun ja, ziemlich überraschend war das Info aus England dann doch, das wir am Wochenende bekamen. Es lautet wie folgt:

Radio Caroline - Comeback im "Roman" RADIOTELEX-AKTUELL++RADIOTELEX-AKTUELL++RAD

In einer englischen Tageszeitung stand letzte Woche, daß das 'Caroline-ship' aus dem spanischen Hafen Bilbao in Richtung Nordsee ausgelaufen war. Ankerplatz soll ungefähr 20 Meilen vor der Küste von Essex sein - in der Themsemündung. Tests waren für das Wochenende vom 6./7. 8. geplant, doch nichts wurde gehört. Am Mittwoch, dem 10.8., wurde jedoch ein Testton auf 963 kHz gehört, des Nachts, genauso wie am 13./14.8. Ronan O'Rahilly wurde daraufhin von einer englischen Station interviewt und äußerte, daß der geplante Start für den 13./14.8. vorgesehen sei, daß man amerikanische Unterstützung habe und mit einem LP-Format 'on the air' gehen wolle, Probleme größerer Ordnung gebe es nicht mehr, man sei nur damit beschäftigt, die DJs bei der rauen See an Bord zu bekommen. Die Meldung, daß das Schiff am angegebenen Ort liegt, wurde inzwischen von der lokalen Küstenwache bestätigt. Und nun wartet alles gespannt auf Caroline's Rückkehr-- in Deutschland war der Testton (s.o.) gestern Nacht zu hören und das nicht schlecht ... RADIOTELEX-AKTUELL++RADIOTELEX-AKTUELL++RAD

Hier etwas Werbung:

Lautsprecher, ein Info für FR-fans erscheint alle zwei Monate in deutscher Sprache. Probeexemplar gegen 2 IRC's oder 1,50 DM in Briefmarken. LS/Lautsprecher-Ekeler Gate 38-D 2980 Norden 1-FRG.

Radio Apollo Int'l, P.O.Box 319, Edenbridge, Kent, U.K., ist nächstes Wochenende zusammen mit Radio 48 (c/o 32 Victoria Road, Salisbury, Wiltshire, SP1 3NG, U.K.) im 48m-Band in der Luft, und zwar Apollo mit einem ARN (=Apollo Relay Network) incl. R.Confusion/Norwegen, R.USA, R.Freedom/Neuseeland, R.Sunday Int'l und evtl. R.Galactica/Belgien sowie einem 30-minütigen APOLLODX-Programm. Frequenzen: Apollo auf 6306 kHz, R.48 auf 6245 kHz.

Die Adresse von Channel Radio (s. Logs) ist : 98 High Street, Ramsgate, Kent, U.K. Das ist übrigens auch die neue von R.Atlantis SW.

NEWS.....

Radio Delmare, Postbus 36, B-2050 Antwerpen, hat, eigenen Angaben zufolge, Verhandlungen mit dem DDR-Botschafter in Belgien aufgenommen, um zu klären, welche Möglichkeit es gibt, bestellte und bezahlte Delmare-Schallplatten in die DDR zu schicken. Die Station kündigte ferner in ihrer Sendung vom 7.8. an, daß man an den kommenden Wochenenden nicht aktiv sein würde, da man noch einige technische Schwierigkeiten beheben müsse. Man hofft aber, im September wieder senden zu können, und zwar: Sonntags 0800-1600 + 2100-0000 GMT auf 6205 und 20600 (!!) kHz.

R.London, c/o 32 Victoria Rd,..., war am 13.08. 'on the air', siehe Logs. Gesendet wurde ein Programm mit vielen alten jingles. QSL-Karten wurden versprochen. Ob die Sendung wohl über den TX von R.Eastcoast Commercial lief?

Die testeten nämlich im März und April einen neuen Sender(mobil, 12V =/240V~) mit 12 Watt HF, quarzgesteuert auf 6249 bzw. 7316.5 kHz. Die alten Sender wurden konfisziert, lediglich Norman Nelson wurde damals erwischt; er wählte den Namen R.Rabbithole, solange er noch keine Gerichtsverhandlung hatte. Er wurde schließlich zu 174 Pfund Strafe verurteilt! R.ECC sendet jetzt jeden ersten und dritten Samstag im Monat von 0830-1330 BST. Wenn der 26m-Band-Sender fertig ist, will man wieder allwöchentlich QRV sein.

Das Studio ist immer noch dasselbe, die Antenne ist jetzt eine 1/2-Wellen-Inverted-V ! Die QSL's sind jetzt gelb. Auch für R.Rabbithole gibt es QSL's bei ECC. Adresse: c/o P.O.Box 319, Edenbridge, Kent, U.K.

R.Lynda, P.O.Box 13, Falkirk, Scotland, wird jetzt vorzugsweise im 41m-Band auf 7315 kHz aktiv werden, wo bisher gute Resultate erzielt wurden. Gesendet wird Sonntags, mindestens 2 mal pro Monat von 0900-1100 GMT.

East Midlands Free Radio Service (EMFRS), besteht seit Dezember 1982 und wird von den DJ's der Stationen R.England, R.Pandora, Castle Sound R. (alle KW), sowie von R.Nova, Leicester und R.Freedom, Derby (MW) getragen. Einige der Stationen wurden allerdings bei eigenen Programmen ausgehoben, und somit entstand EMFRS als eine Co-Produktion. Man sendet auf 6250 kHz mit 20 Watt an einem 1/4 (!!)-Wellen-Dipol und Haupt-DJ ist Paul Rowlands (Castle Sound R.). Die Programme bestehen aus DX-info's der Gegend.

Die Adresse von BBMS, Britains Better Music Station, ist nicht, wie im letzten RT gemeldet, 145 Fleet Street, sondern 185 Fleet Street, London EC4, U.K.

R.Freedom / Scotland, hat jetzt folgenden Sendeplan eingeführt : jeden 1. und 3. Sonntag im Monat von 0900-100 GMT auf UKW 98 MHz (20 Watt) und Kurzwelle 6230 kHz (60 Watt) sowie 9420 kHz (150 Watt). Adresse: Department R, 69 Elm Row, Edinburgh, E87 4AQ, Scotland.

Empire Radio, 190 Monument Road, Edgbaston, Birmingham, U.K., war am 24.7. auf 7375 kHz aktiv. Angesagt wurde auch die Parallel-QRG 6206 kHz im 48m-Band, dort war aber wegen R. Delmare nichts zu hören.

Music Radio Holland, Beumeesweg 151, NL-9661 AE Alteveer, Niederlande, eine neue holländische Station auf Kurzwelle, ist jetzt jeden 1. Sonntag im Monat von 0800-1000 auf 41m zu hören. Briefe und Empfangsberichte können in Englisch, Deutsch oder Niederländisch geschrieben werden und werden ziemlich schnell beantwortet. Bisher wurden 3 Sendungen ausgestrahlt : am 5.6 auf 7325 kHz, am 3. Juli auf 7330 kHz und am 7.8. auf 7310 kHz.

Radio Geron Int'l, ist nach der Sendung am 17. Juli auf 6225/6235 kHz in die Sommerpause gegangen. Mit einem Comeback der Station, die in diesem Jahr bisher nur recht selten aktiv war, ist im Herbst oder ggf erst im Winter zu rechnen. Adresse: Postbus 77, N1-8100 AB Raalte, Niederlande.

Free Radio Service Holland, FRSH, Postbus 41, N1-7700 AA Dedemsvaart, Holland, war zuletzt am 26. Juli via Radio Delmare zwischen 0930 und 1330 GMT mit einem 'Golden Oldie Sunday' zu hören gewesen. Die nächste reguläre Sendung ist für den 21.8.1983, den 3. Geburtstag der Station, geplant und wird evtl. auf 2 Frequenzen (6205 und 7315 kHz) ausgestrahlt. Die Gerichtsverhandlung gegen FRSH fand am 5.8. statt, Details sind jedoch noch nicht bekannt.

So, das waren ja eine ganze Menge Meldungen, die verarbeitet werden mußten. Die jeweiligen Einsender sollen bitte nicht böse sein, weil ihr Name nicht veröffentlicht wird; RADIOTELEX soll, was seine Einsender betrifft, so anonym wie möglich bleiben, um diese nicht

- zu neugierig zu machen ("Wer hat das denn schon wieder geschickt? Was hat der wohl mit der Meldung zu tun?" etc...)
- ,andersherum, in die Gefahr von allzu neugierigen Lesern zu bringen.

Das ist doch einleuchtend, nicht wahr?

Was wird die Zukunft für RT bringen?

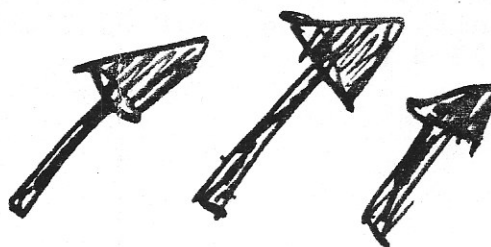

Geplant ist ein Adressenservice für FR-Stationen (wie etwa Postbus 41, Dedemsvaart...), auch wurde vorgeschlagen, eine QSL-Ecke zu bringen. Die Redaktion findet diese Ideen nicht schlecht und fordert die anderen Leser dazu auf, sich mal zu äußern! Überhaupt war eine gute Resonanz zu spüren. Sehr erfreulich !!

Bis zum nächsten Mal, mit allen besten Wünschen an Euch,

73, RADIOTELEX

P.S.: Der nächste Einsendeschluß ist Dienstag, der 30.8.1983 !!!!

Deadline for the next issue is Tuesday in two weeks. Post your contribution in time !!

30-08-1983

Dear readers of RADIOTELEX !

This is RT with another edition, no. 3 to be exact.

Well, at first an explanation:

We don't want to fool any of our readers but it has now been decided that there will be only one edition of RT due to lack of time and this is the English-version because we'd like as much of our foreign readers as possible to understand this mag. I hope it's not too bad for the German readers, isn't it ???

Participation was quite good again and to ensure at first that your contributions for RT 4 will arrive in time at our P.O.Box, here is some information for people writing from outside West-Germany:

Post your logs and news ... days before the deadline !!!

Ireland : 5-6 days ; Great Britain : 3-4 days ; France : 2-3 days

Please note that these periods have been observed the last weeks and do not include any holidays of your country !!

Well, those were the logs until now. Any updaters are of great interest, of course ! Please send them together with comments and suggestions to our mailing address ! Thank you very much !!

NEWS *****

Radio Victoria, P.O.Box 1214, D-6380 Bad Homburg v.d.H., is a new German station which claims to transmit "totally legal" via the facilities of Radio Milano Int'l from Italy. When you will ask ??? According to an info-sheet I had the opportunity to read over last weekend they plan to start transmissions on Saturday, September 17, 1983 at 0700 GMT on 7295 kHz /41m-band. After this opening, regular broadcasts will be made every Saturday and Sunday starting at 0600 GMT ! To test the reaction on this new one, they firstly will be on the air until 1100 GMT and see what response they'll get. Everyone who writes in will receive a QSL-card and a so-called 'Fanzine'. So far what the info-sheet said. We'll see what is to hear then...

As reported in the last edition of RT, R.Caroline is on the air again on mediumwave 963 kHz. The programme up to now only consists of LP-music with announcements in between - the Caroline-jingles and advertisement are still missing. But it is planned to start off with that in September. Caroline's address is : P.O.Box 96504, Los Angeles CA 90069, USA.

Caroline continued ...

The programme of Radio Caroline was relayed on August 21 by the English landbased station R.Black Fox on 7330 kHz. Their address is at:Maxdene, South Carey Street, Castle Carey, Somerset, England. DJ is Kenny Stone.

Radio Krypton, 134 Eastworth Road, Chertsey, Surrey, UK has now moved to 6262 kHz to get away from interferences with Capital Radio on 6268 kHz. There are also tests on 7710 kHz in parallel to 48m from 1000 - 1200 .

FRSH, P.O.Box 41, NL-7700 AA Dedemsvaart, Netherlands, is now on the air every 3rd Sunday of the month on 6205 kHz via R. Delmare. From time to time also relays are planned on 7315 kHz via a British station. Peter Verbruggen was eventually fined hfl 500. When he was raided in January this year he lost equipment worth hfl 1500 or around that.

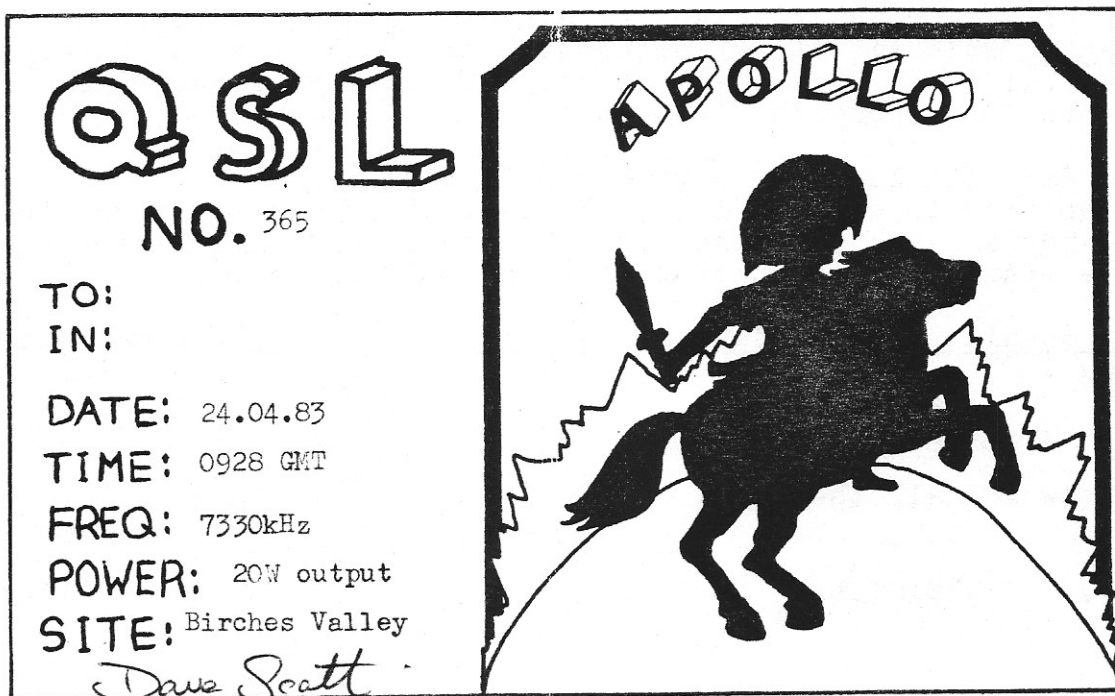

Radio Arena, a new station from the Netherlands was heard on August 28 on 6245 kHz with a test-programme containing announcements in Dutch and English. Address is: Postbus 47, NL-7010 AA Gaanderen, Netherlands.

Coast Sound Radio, made another broadcast on August 21 on 6240 kHz, amongst others, a show of guest-DJ George Strong was heard. CSR plans to be on the air on special dates despite the fact that the last-ever programme was in December '82. What are 'special dates', CSR ???! Their address is the same as FRSH's.

Channel Radio started its transmissions on July 31 and plans to be on every 2nd Sunday of the month on 6200 kHz. Power thrown into the airwaves is 10 Watts, the antenna used is a 1/2-wave dipole. DJ's are Samantha, Bobby Bristol and Clem. They have a nice QSL-card and do reply when a SAE is enclosed. Address is: 98 High Street, Ramsgate, Kent, U.K.

A D V E R T I S E M E N T *** A D V E R T I S E M E N T *** A D V E R T I

LS,Lautsprecher is a German FR-magazine. You can have a sample copy of LS when you send 2 IRC's to: LS, c/o P.O.Box 700 825, D-2820 Bremen 75, West-Germany. Try it !

Abbreviations used in RADIOTELEX

E= English	F= French	//= in parallel with	s/on= sign on
G= German	D= Dutch	s/off= sign off	QSO= station contacts
It= Italian	QSY= change to another frequency		another live

CBN, Clandestine Broadcasting Network, plans to be on with their 'overseas'-service on September 4 and 25 on 13995 kHz in USB and an output-power of 500 Watts. Address is at 1 Brown's Lane, North Sydney, NSW 2060, Australia.

Radio Freedom/Star now has changed its name to KIWI-Radio to make sure that one doesn't mix them up with another station. Transmissions via European relays shall, as well as local own broadcasts, run from 2100 - 2300 GMT and between 0400 and 0600 GMT with 70 Watts in the 48 and 25 m band. P.O.Box 1437, Hastings, New Zealand.

Radio Valleri, station from Ireland in 1973/74 on 6317 kHz plans a comeback. Probably via R.Enterprise, referring to that frequency ??

Voice of Peace are testing their shortwave-equipment on 6240 kHz with 400 Watts from 0600 - 0000 GMT in parallel to their mediumwave-output on 1540 kHz and on FM 100 MHz. Programmes are in Hebrew (news) and English. Reception reports are welcome at P.O.Box 4399, Tel Aviv, Israel.

NEWS FROM ITALY

91 (Ninety-one)-Radio plans to be on 9845 kHz with 800 Watts in September and they are at: Via P.Giovanni XXIII, 3, Travaco Sicc (Pavia), Italy.

Radio Milano Int'l transmits on 1300 kHz and also on 7205 kHz and on 11565 kHz.

Radio Marilyn is another mediumwave-station (1169 kHz) which plans to be on the air also on shortwave. Possible frequencies are 9975 kHz and 11645 kHz. Their address is : Via Andreini 31, I-40127 Bologna, Italy.

Tele Radio Pace is on 15460 kHz with 5 kW !!! between 1800 - 0700. Address: Via Ragazzi della Pace, I-37020 Cerna di Verona, Italy.

Back to our last regular news-item concerning the new address of Radio Xanadu which is at 42 Northcote Road, West Croydon, Surrey, UK. But it is said that this station is a bad replier to reception-reports and letters ??? I hope they're not !

Well, so far with logs and news for this time. Please remember to send in logs, news, and other contributions to our contact-address which, by the way, is open to any new station on the shortwave (perhaps also other wavelengths will occur ??).

The next deadline is Tuesday, September 13, 1983 *** Please note that ! Thank you !

Bye for now and all the best,

F.F.F.R., RADIOTELEX

Deadline for the next issue is Tuesday in two weeks. Post your contribution in time !!

13-09-1983

Hi there !

Here is another RADIOTELEX, "fresh from the copier", hi !!
Contributions were numerous, thanks to those who sent in logs and news-items ! Well done !

To start with, here are the latest loggings. Time is, as ever, GMT as well as in the whole mag.

3-09-1983

kHz	+Station	+Time-period	+Language, Remarks	+S-rate
7317	Eastcoast Comm.	0900-1050	E, s/off	4

4-09-1983

6225	WLS	0936-1012	E, also spurs on 6205 + 6245	3

Well, after the actual logs here are some updaters to the last issue of RT (no. 3):

- 21-08: 6236 kHz/R.Ireland Int'l with ID-tune at 0810 GMT.
- 28-08: 6240 kHz/R.48 test-broadcast, not the Voice of Peace ! (1122)
- 31-08: 6239 kHz/Voice of Peace with English-religious programme at 2215 with S=3.

This is RADIOTELEX with the "SAE-service", ATTENTION READERS !!!!!!!!!!!

Do you know the problem of a reception-reporter buying IRC's to enclose them to his/hers reports ? Or even the FR-station buying hundreds of envelopes to answer those letters ? Well, the idea of RT is to offer you mint stamps of those countries you are going to write to. So you can send a Stamped Addressed Envelope to the station and the operator won't find himself stuck in envelopes and IRC's and stamps (he/her instead would have to buy , too ...). However, stamps of Great Britain (20 1/2 p), Ireland (29-31 p) and the Netherlands (70 cents) are needed by RADIOTELEX. So, readers in the countries mentioned, please let us know if you could make the deal with us (we will send you the equivalent in banknotes so that you can buy the stamps concerned and send them off to us). Worth to think about ?? We hope so. Anyway, we'll let you know when it will be possible to buy stamps from us.

NEWS

We got the information that Radio Eastcoast Commercial has a very interesting DX-programme every first Saturday of the month starting at around 1000 or a little earlier presented by Norman Nelson and Jill Peters (hope I spelt that o.k...hi!). The information is collected by Neal West. Frequency is 7317 kHz at the moment but, referring to our log-section, other channels are also possible. Also look out for a parallel channel which is planned !!

The World Listening Service (WLS) has returned on Monday, 29-08-1983 to the air at 0900 on 6265 kHz in the 48m band with an engineering test-broadcast. The station hopes to be on the air every 1st and 3rd Sunday on 48 metres with a more news and information format rather than solely music. Their address is at 14 Queens Drive, Narborough, Leicester, U.K.

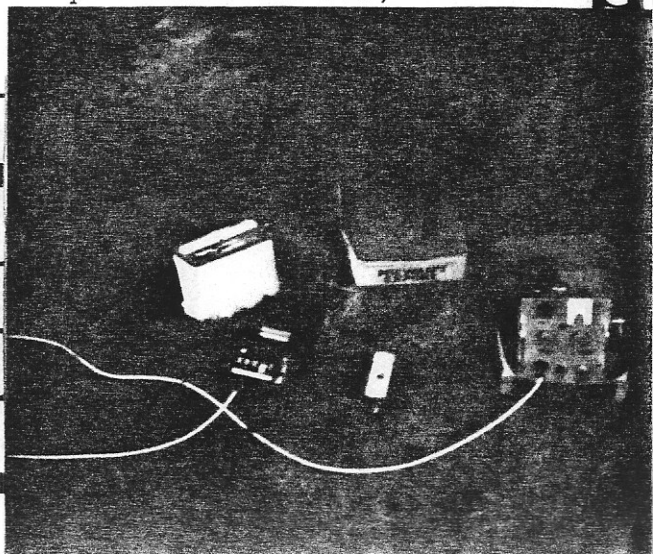

The Voice of the Leek, c/o P.O.Box 319, Edenbridge, Kent TN8 6QE, U.K. also made a broadcast on August 29 from 0935 to 1105 on 6206.667 kHz as reported in the log-section of RT 3. The station was broadcasting with a power of 30 Watts through a 15 feet high aerial from Central Wales.

R.Iris, station "with history" from Amsterdam was heard last Sunday (11-09-) on 48 metres 6235 kHz (see logs). The address of Radio Iris is Postbus 2036, Amsterdam, Netherlands. They are known as a station replying quickly to letters. Maybe they are on a few times more often the next weeks !!??

R.Jacqueline or R.Free Jacqueline was heard on August 28 from 1410 (tune in) to 1430 on 6230 kHz at which time it was stated that they would be back in 2-3 hours time, and indeed they were at 1730 until 1800 on 6290 kHz. The DJ called himself MARK or something other. The station pops up from time to time sometimes using the name R.Belinda using a 12 Watts VFO, Dutch-type-modulation. The address 86 Roding Lane North, Woodford Bridge, Essex, U.K. is sometimes mentioned but no replies to listener's letters have ever been received !

We must also renew ours assuming that R.Xanadu is a bad replier to reports etc.... Letters are now answered. Their address again : 42 Northcote Road, West Croydon, Surrey, U.K.

R.Stella made a test-broadcast on 6305-6 kHz last Sunday (11-09-) with an enormous signal here in Germany but obviously had problems with the technical side of the thing. Anyway, they use the address 17 Glendevon Road, Edinburgh, Scotland. See below what equipment Jock Wilson uses (By the way, this picture is send free of charge to regular listeners of R. Stella. I hope it will reproduce well ...):

QSL RADIO STELLA**FROM.****DATE.** 6/3/83**TIME.** 0945 - 1000 GMT**FREQ.** 7320 kHz**POWER.** 20 watts**LOCATION.** Central Scotland**SIGNED.** Jock Wilson**SCOTTISH****FREE****RADIO**

The next programme from R.Apollo Int'l, c/o P.O.Box 319,... is expected for September 25, 1983 and will be transmitted on a 41m band channel (either 7330 of 7340 kHz) because the situation (namely: reception conditions) have turned back to normal which has the result that U.K.-stations are now again be heard in their own country , hi !! Programme will consist of 30 minutes Dutch, 30 min German, 1 hour (!!) ApolloDX, plus 45 min John Allen. Dave Scott will be happy to read your letters !

R.Avalanche, c/o 32 Victoria Road, Salisbury, Wiltshire SP1 3NG has been heard on Sunday, 11-09- via Radio Eastcoast Commercial's transmitter but unfortunately was overmodulated. Anyway, the signal was bombing in here ! There was also a show by Danny Kay featuring German music which isn't everyone's taste ...hi...

Here are some FM-news for Germany :

In Berlin, 2 pirates were heard the 5-09-1983 one of them was called Radio Roter Stachel - Die Stimme der illegalen kommunistischen Partei der DDR (The Voice of the illegal communist party of the GDR)...

On August 31st, Radio Eulenspiegel from Braunschweig made a 6-minutes extra-transmission because of an anti-war-demonstration on September 1st 1983. They are on regularly every Wednesday-night at 1700 GMT on 101 MHz starting again in October.

The 24-hour programme of Radio Bavaria Int'l (italo-commercial) wasn't only audible up to Munich but also farther north in Germany. Frequency: 104.7 MHz.

[illegible]

No reactions have been received concerning a QSL-corner. So, this is the place to put this question again to the public !
If no reactions are received a QSL-corner will be tried out in
RADIOTELEX No. 5. O.K. ???!

You probably have noticed that LS-Lautsprecher now uses the RT-address-service. Do you know any OP of a FR-station who would also like to do so ? Or even you are an OP yourself ? Dont't be shy and write to us. Secrecy is obligate, O.K.?

Well, nothing to add and, I hope, nothing forgotten !

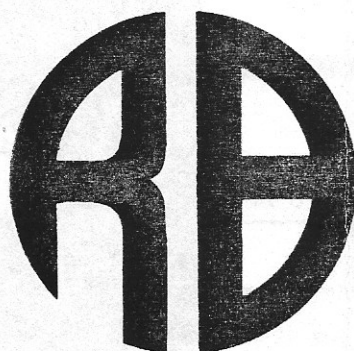

Until next time, deadline is September 27, 1983 a Tuesday as ever !!!!

Write in !!

27-09-1983

Hi there !

At first: thanks to all DX-ers who have written in the last weeks. It's really amazing how the interest in RADIOTELEX increases from issue to issue. As a result we had a sold-out of our no. 4 !

We think it's time to give you the time-periods your letters travelled from your country to our P.O.Box again. Here they are :

U.K.: 3-5 days, depending where the DXer lives. People in the North have to write in a bit earlier than those living in or around London.
Finland: 5-6 days , Sweden: 6 days , Ireland: 5 days, France: 3-5 days.

This means that you have to post your useful contributions the amount of days shown above before the next deadline. By the way, this is

****Tuesday, October 11, 1983 for RADIOTELEX no. 6 !**

To start with as usual, here are the logs. Time is GMT !

UPDATER

Here's one important updater to the log of R.Daytona of September 11, 1983 on 6240 kHz :

The operator of Daytona was on his own while being in the transmitting-studio. At around 0830 his dog began to bark loudly but the OP believed it was due to cows outside. What he could not have known was that there was armed police together with Dutch GPO-men waiting for Daytona's start (all in all 7 persons!). When the programme had commenced, police and GPO raided the house and confiscated the short-wave- and mediumwave-transmitter together with studioequipment worth several thousand Dutch-florin. A farewell-transmission is planned via another station, probably R.Gerona. The OP of Daytona now sells copies of the mastertapes of the programmes transmitted in June, July, August, and September. Every programme is on 3 compact-cassettes C60 of high-quality (TDK) and costs DM 40.-- (EACH!!!!), You can contact R.Daytona via Postbus 10, 9540 AA Vlagtwedde, Netherlands.

11-09-1983 :-6225 kHz 0938 : Identified as "Radio Non-Identified" (??)
 -7325 kHz 0820 : 100% Identified as R.Atlantique 2000

NEWS

East Coast Radio is an new Irish station which was on September 18 with a test-transmission on 6210 kHz. Their address is: 24 Joyce Road, Drumcondra, Dublin 9, Ireland.

Weekend Music Radio from Scotland, long-living station, has been heard with a live transmission 18-09-. The operator had to sign off abruptly because he had stomach trouble after eating a bad coconut.

WMR continued...

Nevertheless, you can still contact them at 42 Arran Close, Cambridge, U.K. but as it seems, WMR is not a good replier to letters ...

R.Enoch, political station from the U.K., repeated programme of 11-o9-again on September 18. They plan to have their next transmission on October 2, that's next Sunday (when it's the same again, it doesn't matter anyway...hi).

Here is the address for the Italian-station on 9420 kHz, R.Europa Int'l: Box No. 1, I-18030 Perinaldo-Imperia, Italy.

R.Waves Int'l, new French station planned to be earlier on this year, have been trying to buy a transmitter in the U.K. The first one fell through as they were ripped off at the customs. Now they are getting R.Apollo's engineer Chris Evans to build a 20 W shortwave-transmitter which should be ready in 4 weeks. So maybe RWI will be on the air in November ??

Satellite Broadcasting Company planned to make their first transmission via R.Daytona (which isn't possible any longer now, see page 2...). But they also booked a relay in the Apollo Relay Network soon (around November).

Radio USA who announced the Arcata-address in the recent ARN-relay have changed their address and are now at P.O.Box 245, Moorhead, MN 56560, USA.

KIWI-Radio (ex Freedom/Star) from New Zealand have closed down. There will also be no more relays via European-stations.

A station we all didn't expect to return again is KLA-Radio. A year ago they started on shortwave with a small self-built rig but, unfortunately, disappeared at the beginning of this year. When they left the bands, they had own stickers and even pencils with 'KLA' on them. We're not sure if they still use their old address 35 Fair Oak Lane, Chessington, Surrey, U.K. but listen out on the bands the coming Sundays (7334-5 kHz, see logs of 25-o9 !).

QSL-CORNER *****

Well, not many readers showed reaction on that idea but here are some items we found in our logbooks....here we go....

Station	+kHz	+days	+sent	+received
R.Atlantique 2000	7340	22	2 IRC	QSL-card, info
R.Iris/Amsterdam	6235	08	1 IRC	QSL-letter, info
R.Victoria	7295	09	stamps	QSL-card, sticker, 'FANZINE'-mag

Not much, really. Apart from that, we would like to know your general opinion on the SAE-service-idea. We are thankful to those who wrote in about that but we like to have as many reactions as possible to start off with that service. Also people are wanted who can buy stamps of their country for us when we send the equivalent money to you. Contributions from the U.K.-subscribers are not so urgent (as we have the necessary connections to this country...) as those from Ireland e.g. or France etc.

Anyway, all your contributions are welcome !!!

For more news, turn over to the last page of today's issue !

On with the item that R.Victoria with the address Postfach 1214, D-6380 Bad Homburg v.d.H., West-Germany has started regular transmissions on September 17 via R.Milano Int'l on 7295 kHz. The station now broadcasts every Saturday and Sunday starting at 0700. For more information what music can be heard when please write to them directly. The schedule is too long to be reproduced here...

Süd West Radio, Postfach 1471, D-6690 St. Wendel, West-Germany has, referring to them, a transmission running on 104.4 MHz (channel 58) with around 20 W of power. Language is German.

Sender Freies Ludwigsburg is on every Friday on FM (frequency not known) starting at 1600 GMT. On shortwave, this station is known as R. King Kong Int'l (Postfach 211, D-7146 Tamm, West-Germany). This station plans to issue a "Free Radio Address Sheet" in the near future which should be obtainable for 1IRC.

The next transmission of BBMS is either October 9 or 30, 1983 on 7325 or 7310 kHz. Start is 0800 and the transmission will last until 1200. Their address is : 185 Fleet Street, London EC4A 2HS, U.K.

One operator of Radio Enterprise/Ireland has emigrated to the USA. The reason for Carl to do so was the very bad situation on the working-market in Ireland. He now lives in New Jersey.

R. Eastcoast Commercial now uses the address 32 Victoria Road, Salisbury, Wiltshire SP1 3NF, U.K. in addition to the old P.O.Box 319, Edenbridge, Kent TN8 6QE address-service.

It seems that most QSO-stations have left the so-called Echo-Charlie Band (6500-6600 kHz) and are now QSO-ing mostly in the 41 metre- Band between 7300 and 7400 kHz due to the fact that a number of stations using frequencies between 6400 and 6900 kHz were raided because of interference with military radio-services. Two of the most active stations at the moment are Alpha Victor 3 from England (R.Bluesky ?) and Juliet November from the Netherlands (R.Nolan Int'l).

R.Caroline SW is going to have a final broadcast soon (October ??) because of Caroline-offshore having re-appeared. Freddie Archer announced that letters for the offshore-station can be sent to his station-address P.O.Box 1, Brandon, Suffolk IP 27, U.K. and he'll pass on those to the Caroline-people on sea. This is not too bad because Caroline-offshore has problems with the USA-address. If you should use this, do not put their name on the envelope, just P.O.Box 96504, Los Angeles, CA 90069, USA. This, by the way, is also a good hint for FR-stations anyway : ALWAYS PUT THE ABBREVIATED STATION-NAME ON THE ENVELOPE, NOT IN FULL LENGTH !!! THANK YOU !!!!!

World Music Radio, Postbus 4078, 1009 AB Amsterdam, Netherlands is going to be relayed via R.Dublin on 6910 kHz Sundays 0700 to 0900 to Europe with a repetition of this programme to North America the following Monday 0100-0300. Nothing has been heard so far.

Well, a lot of info this time so that I can print no pictures today (hi...!). Remember that our address is open to any FR-station or FR-mag such as LS-Lautsprecher. Don't be shy and write in !!

The deadline for no. 6 again : October 11, 1983 !

Bye for now,

RADIOTELEX - FREE RADIO BULLETIN - Alle zwei Wochen neu / appears fortnightly

Jahresabonnement : DM 25,-- (in Scheinen) für 26 Ausgaben, Einzelexemplar : 1 IRC oder DM 1,20 in Briefmarken. Subscription fee : DM 25,-- (in banknotes) for 26 issues per year, single copy : 1 IRC or DM 1,20 in mint stamps.

Die Preise gelten für Deutschland und das gesamte Europa / the prices are valid in Germany and all Europe.

****CONTACT : c/o P.O.BOX 700 825, D-2820 BREMEN 75, WEST-GERMANY****

Einsendeschluß für die folgende Ausgabe ist jeweils der übernächste Dienstag.

Deadline for the next issue is Tuesday in two weeks. Post your contribution in time !!

11-09-1983

Hi to you all !!

RADIOTELEX no.6, that is fast information on the latest events concerning Free Radio (as our promo-spot via several FR-stations says...). Talking of those spots, we noticed that almost all of you mentioned the FR-station on which you heard it - that's great ! Please keep on doing so ! We also would like to know if it was easy for you to understand our message or not. Write in ! We'll always like to hear from you ! It seems that our information on the periods your letters ran from you to us has been very successful. The most important country at the moment for foreign letters is the U.K., so here that info again: 3-5 days is a normal figure. So, please post your letters 3-5 days before our next deadline which is October 25, 1983 for RT no.7 ! Keep that in mind !

*****NEWS FROM THE SAE-SERVICE*** ...**

The start for our planned SAE-service (see RT 4/1983) is most probably on October 25 this year, the same day as our deadline by the way. From then on it will be possible to obtain mint-stamps from the U.K., the Netherlands and France. Stamps of Germany are also available, of course. Here are the different methods how to get them:

Step 1: Enclose 1 IRC to each order and 1 IRC extra for every country.

Step 2: The maximum quantity per order is 5 stamps of each country. The exception is West-Germany: You can have as many stamps as you like from this country.

Step 3: Terms of payment: People from the U.K. have to send in one 20 1/2 p-stamp plus a 5p-stamp (in 1p-stamps is preferred!) for a 1 DM-stamp of Germany. If they like to have a 2 Francs-stamp or a 70 cents-one of France or the Netherlands respectively a single 20 1/2 p-stamp will make it !

****Deutsche Leser schicken für jede U.K.-Briefmarke eine 80 Pf-Briefmarke (in 50 Pf und 10 Pf-Werten wenn's geht, bitte !). Für Frankreich und die Niederlande tun's 70 Pf-Marken (auch hier Teilbeträge bevorzugt !). Ihr erhaltet dann postwendend 20 1/2 p-Briefmarken für das U.K., 2 Francs-Briefmarken für Frankreich und 70 cents-Werte für die Niederlande.**

*****French DX-ers send a 2 Francs-stamp plus a 50 centimes-one for one equivalent from Germany or Great-Britain. A single 2 Francs-one is sufficient for a Dutch stamp.**

Well, all in all a very fascinating (as well as exhausting...hi!) job to print all this. I hope there's no fault in it ! This offer is valid until November 30, 1983. We hope to extend this offer after that (or even before...) also to other countries such as Ireland or Sweden. It will also be very nice of you when you enclose a return - envelope with your address on it, NO stamps, please ! Thank you all for your attention !

Well, all those who thought that there would be no log-section in the current RT : Here they are

County Radio	----	89	2 IRC	QSL-card, letter

One other DXer promised to send his QSL-corner contribution next time. I bet that most of you just forgot to send those items this time, hi ! Please send it next time ! Thank you !

On with the news.

R.Atlantique 2000, Postbus 41, NL-7100 AA Dèdemsvaart, Netherlands, is scheduled to transmit every 2nd and 4th Sunday of the month from 0900 to 1100 on either 7325 or 7340 kHz. Programmes are in French and you can easily identify them as at the beginning and at the end of each broadcast they play a piece of instrumental music by Jean-Michel Jarre.

Channel Radio seems not to keep their 2nd-Sunday-of-the-month-schedule on 6200 kHz because nothing has been heard last Sunday. Anyway, their address is at 98 High Street, Ramsgate, Kent, U.K.

Radio Victoria, c/o Postfach 1214, D-6380 Bad Homburg, West-Germany sent their pressreleases no. 3+4 to RT- many thanks for being that kind ! There will be several things changed beginning next weekend, October 15/16, 1983. These are :

- It is hoped that R.Time , one of the relay-stations of Victoria, gets the programme-tapes for this weekend as they didn't get those for last. Reason for that was that there had been no one at R.Time who could have taken the mail from the postman.
- Victoria plans to be on from October 17, 1983 onwards EVERY weekeend and they say that they do not break promises "like other stations did"
- R.Victoria is heard from the 22/23rd October onwards simultaneously via 7295 kHz/R.Milano Int'l with 5 kiloWatts and via R.Time on 7195 kHz with 2 kiloWatts of power. The change in frequency of the latter will be made due to interference from a radio-amateur of Switzerland. "Legal" action against him is planned. We are excited to hear more !

Britain Radio Int'l, c/o 32 Victoria Road, Salisbury, Wiltshire SP1 3NG, U.K., is going to test their 41m-band rig soon on 7375 kHz (see UNID in log section !-ed). BRI has been having some problems with their current channel 6225kHz which is used by other stations very often as well. The station is also looking for people to record some short...

BRI ctd... station-ID's in German, Dutch, and other languages for them.

FRSH, Postbus 41,... could not have been relayed by R. Delmare in September due to the strike of the public-services in Belgium including the Post Office. Anyway, FRSH was back October 9 (logs) on usual 6206 kHz but the announced parallel outlet via a British-station on 7315 kHz or around that has not been heard.

County Radio, c/o P.O.Box 319, Edenbridge, Kent TN8 6QE, U.K. now offers a T-shirt (gosh !!!-ed) for sale. It costs £ 3.49 each. The next broadcast will take place over Christmas, probably on 7350 kHz.

A Radio Batida announcing themselves to transmit from Northern Germany has been heard last Sunday, October 9 on 7286-8 kHz in the 41m-band. They played mostly reggae and funk-music but announced no address. They instead said that they will be back most probably next Sunday, October 16, 1983. The DJ called himself "Michael". Listen out !

KLA-Radio made their return on September 25 as reported in the last edition of RT. Well, they were on again on October 2nd with 2 different outlets and, much better, with two completely different programmes. They were heard on 6529 kHz (15 Watts) and on 7333 kHz (15 Watts, too). The station closed down due to the OPs had to finish their college and several staff-problems. After selling their old TX they now use 2 completely new self-built ones. For the time being transmissions will rather be sporadic than regular but they plan to come back to their old 'every two weeks'-sked. They also have a new address which is: c/o 16 Windmill Lane, Long Ditton, Surrey, U.K. Please write to them, they are waiting for your letters !

Radio Pacific Int'l, c/o 3 Rosewarne Cottages, Rosewarne Downs, Nr. Camborne, Cornwall TR14 0BE, U.K. was heard on September 25 1983 at 0853 with DJ Richard Graham via the transmitter of R. Ireland Int'l on 6294 kHz. It is expected to hear further broadcasts via this relay or others.

There is the news on the info on Superstation Helena (ref. RT no.1). There is no station like SH and it is thought that this story has come about as a figment of imagination by Ian McKay of UK GM. Sorry.

R. Eastcoast Commercial, c/o P.O.Box 319,... as well as 32 Victoria Rd tested their transmitter on 11586 kHz September 24+25. The Saturday broadcast is said not having been too good due to transmitter-problems. More tests are planned the coming weeks. Two outlets will be used alternatively as follows:

1. Saturday : 7317 kHz as well as on the 3rd Saturday of each month.
2nd and 4th Saturday is planned for transmissions on 11586 kHz.

Any 5th Saturday that occurs will be taken as a rest-day.

The DJ-line-up is as follows: Steve James, Norman Nelson, Pete Edwards, Dave Silver, and Jill Peters who will pop up every 1st Saturday along with Norman Nelson to present the DX-show.

The Voice of Peace continues testing on 6240 kHz and can be heard after midnight with a sufficient signal. Power is 400 Watts but it should be raised to 10 kiloWatts. The TX is home-built. Their address again : P.O.Box 4399, Tel Aviv, Israel.

The station Radio Roter Stachel (ref. RT no.4) transmits regularly every first Monday of the month at 2130 on FM 101 MHz. Political-statements against the GDR-regime are made and fault is found with the falsely-understood socialism in the GDR and USSR.

There is no place left and I'm happy that you read this RT until here. Thank you very much and don't forget our deadline (page 1)

F.F.F.R.

Deadline for the next issue is Tuesday in two weeks. Post your contribution in time !!

25-10-1983

A big hallo to all readers of RT !

Well, suffering from a bad cold at the moment, I almost cannot see the typewriter, hi !

There have been quite a lot letters over the past two weeks and a question often asked is: How many regular subscribers does RT have by now ? As we won't give away any names, here are just 2 figures: 8 from Germany and 5 from foreign countries plus around 5 irregular supporters.

****We also like to inform every reader of 2 special RT-offers :**

-The RT-address-service. RT offers a service for any FR-station which already has no address to write to. Don't be shy and contact us ! We immediately will let you know our conditions. Spread the word !

-Our SAE-service is due to start next week, November 1, 1983 (Tuesday). So-called ordersheets are attached to this issue for anyone who writes in from Germany and the U.K. Such ordersheets for other nationalities will be issued with a little delay and will be send free upon request to everyone interested. By the way, those sheets also carry information on the general idea behind the SAE-service (that only in case you don't know RT by now)

CONFUSION ? CONFUSION !

Some errors have been revealed by several of our attentive readers. Many thanks for that ! Even for the last deadline (no.6) we received a correction concerning R.Caroline Offshore's address. We mixed up 2 figures of the P.O.Box in no.3 + 5 and now here is the right one : c/o P.O.Box 69504, Los Angeles, California 90069, U.S.A. Don't put station's name on envelope !

Writing about Caroline, a blunder occured in the log-section of no.6: Caroline's frequency is 963 kHz, not 936. Perhaps we confused it because the local station R.Bremen is on 936 ? Sorry !

R.Victoria also was a victim of a hasty editor in no.6 ! DJ Roger Kirk wrote in via another DXer (why not directly ?) and pointed out that RV has difficulties with the R.Milano-people not receiving RV's tapes and not with R.Time ! Of course, RV is on every weekend since September 17, not October ! We hope such errors won't occur the next times! Sorry, Victoria !

Before we start off with the current loggings, here is an updater to RT no.6 :

9-10-1983, 7373 kHz (logged as UNID on 7375 kHz) was E.S.T. (Electronic Sound Transmission) from England with the address: c/o 190 Monument Road, Edgbaston, Birmingham, U.K. The programme was a relay of FM on a SW-transmitter of 10 Watts.

NEWS

R.Mediterranean or Madison as it sometimes sounded is a new station heard with test announcements October 23 on various frequencies in the 41m band (ref. logs !). The station used an overlong discomusic-title which also was heard on R.Lynda/Scotland the same day and one week before on 7319 kHz, a frequency R.M... used on October 23... Even on October 2 a station announcing a similiar name was heard on 48m (6265-7 kHz) and the modulation was considered as "sharp" (ref. no 6!) an effect also observed on R.Lynda ! Very strange indeed ! Well, the station announced regular programmes starting October 30, 1983 that's next weekend. Perhaps then they will give an address to write to. R.Lynda's address is (to take the occasion...): c/o P.O.Box 13, Falkirk, Scotland.

One of the operators of R.Atlantis SW told a contributor to this issue that they plan a live broadcast with a live phone-in some time during December 1983 (Christmas ?-ed) using shortwave and mediumwave in parallel, the latter being 263 metres (=around 1140 kHz). They can be contacted at 98 High Street, Ramsgate, Kent, U.K.

R.49 International started its first regular Saturday morning broadcast via R.Delmare on October 8, 1983 with a Dutch programme presented by DJ Peter Peterson and an English one by Steve Most. Transmitting times were 0930 - 1100 and the frequency as usual was 6206 kHz. It's not sure when the next programme will take place or if they're going to keep a regular schedule. On October 23 R.49 Int'l was heard via R.Mi Amigo from the Netherlands with the address Postbus 627, 7550 AP Hengelo, NL. There was also a Steve Most-show on Mi Amigo

R.49 continued...before the (now regular ?-ed) 49-programme with lots of RADIOTELEX-promo-spots in it (thank you, Steve !-ed). We already have reaction on the spots heard there !

R.49's address is : c/o 3 Rosewarne Cottages, Rosewarne Downs, Nr. Camborne, Cornwall TR14 0BE, U.K.

The next co-site broadcast of R.Apollo Int'l and R.48 will most probably take place on November 6, 1983 with Apollo using a 41m band channel (around 7330-40 kHz). Their addresses: Apollo, c/o P.O.Box 319, Edenbridge, Kent TN8 6QE, U.K. and 48, c/o 32 Victoria Road, Salisbury, Wiltshire SP1 3NG, U.K.

R.WBI (R.Walvisbaai Int'l) was heard on October 23 in the 41m band and now uses the address: c/o Postbus 41, 8080 AA Elburg, NL. They were co-programming with R.Delta which uses the same address.

FRSH will probably have an extra-transmission on October 30, 1983 on 7317 kHz. FRSH announced a 'very special broadcast' to take place in November via R.Delmare. Maybe an extension of their current schedule ? They've now issued a sales-list including offers of various FR-cassettes as well as photos available for 1 IRC.

Here is a supplement to the log of October 2 on 7320 kHz (no. 6): The contributor says that he is 100% sure that this was Scandinavian FR as he made recordings of the ID. Thank you !

R.Ireland Int'l from now on will transmit on 6298 kHz. Their address is: c/o 1c3 B, Dublin Industrial Estate, Dublin 11, IRE.

R.Arena c/o Postbus 47, 7010 AA Gaanderen, NL uses a BC 610 transmitter (ex army) with an output power of 1000 Watts (Dutch watts ?-ed). The antenna is a 50m longwire (about 160 ft, for all our U.K.-readers!) in a height of 18m (60 ft). R.Arena also operates under the name of Hofnar on mediumwave and the Citizen Band for 6 years now. On August 28 1983 it was the first time for him on shortwave.

Here are 2 info on other FR-magazines :

LS, LAUTSPRECHER, is a FR-mag that appears irregularly every 2 months and is in the German language. The next issue will be out in November and costs 2 IRC or DM 1,50 in mint stamps. The price for 4 issues is 5 IRC or DM 4,50 in stamps. Their address is the same as for RT: c/o P.O.Box 700 825, D 2820 Bremen 75, West-Germany

AIRSPEC NEWS c/o 36 Nottingham Road, Lowdham, Nottinghamshire NG14 7AP, U.K. is a monthly mag and costs 1op + SAE in the U.K., 1op + IRC in Eire, 2 IRC in Europe and 3 IRC elsewhere.

-----*****-----ATTENTION-ATTENTION-----*****-----
Any news of RT may be used in broadcasts or other magazines provided credit is given to RADIOTELEX. Thank you !
*****-----

Weekend Music Radio has been heard on October 23 with two parallel outlets (6240 + 6265-6 kHz). If they still do not reply to any report, we just don't know ! Anyway, here's their address again : c/o 42 Arran Close, Cambridge, U.K.

A general message to reception-reporters:

Please, don't put the station's whole name on the envelope when you're going to send a reception-report ! Always leave the "Radio" of the name. Example: Instead of 'Radio 49 Int'l' just write R49 ! You'll do a favour to the address-operators and even will be more sure of receiving an answer ! Please, keep that in mind. The same is valid for any mag! ++RT++

Well, just enough place to tell you our next deadline: November 8, 1983 ! Oh, sorry for being one day late but the cold is terrible !

Bye for now, F.F.F.R.

8-11-1983

Hi !

This is RADIOTELEX with no. 8 - that is actual information on Free Radio. Foreign readers will note our new "head" of the first page. Yes, from now on you can obtain RADIOTELEX for one year (26 issues) and, most easy, it is possible to send the subscription-fee in your currency.

We received a complaint today saying that the habit RT prints the frequencies in the log-section is not so good because everybody thinks that the stations use VFO (variable frequency controlled) transmitters when there is a frequency printed as e.g. 6205-7 in the case of R.Delmare. Well, we like to make clear why we do so.

-There are many contributions every deadline concerning one station. Everyone writes that he heard the station on ... kHz. This figure differs, of course, from contributor to contributor. But anybody who might read RT and compares the log-section with his own logbook is helped more in identifying a station than reading just one, probably 100 % O.K., frequency - and reading over it because he logged the UNID in his logbook 1 or 2 kHz beneath the published one

-When a contributor writes "I have the possibility to read the transmitting-frequency nearly 100% exact." ... he will be trusted ! But we think it is better not to print this - and nothing else !

Stations whose frequencies vary are marked with a 'v' after the QRG. Now, here are the logs of the past two weeks. Times are in GMT, as ever.

29-10-1983

UPDATER

23-10-1983 (RT no.7): 11460 kHz was 100% R.Benelux.

16-10-1983 (RT no.7): 6275 kHz Whisky Mike Romeo One was the operator of Weekend Music Radio from Scotland who, by the way, also appears in the log of October 30 (this issue !) under the same name. That day he was calling Prince Terry again mentioning that R.Stella who should have been on that day were not due to technical problems. R.Stella's address is: c/o 48 Pentland Park, Loanhead, Midlothian EH20 9AP, Scotland

23-10-1983: 6275 kHz /R.Free City from Scotland have their own transmitter and therefore were not relayed by Mi Amigo R. from Ireland. Mi Amigo R. recently had problems with their transmitter (on 16-+23-10) experiencing RF-feedback and on Oct 30 their amplifier had blown so that they had to rely on a slave amplifier.

On October 23, Sunrise R. from Sweden were transmitting between 0900 and 0945 on 11400 kHz in the 26m band. Unfortunately, it is not known when Sunrise will be back regularly.

R.Nova, Postbus 85, NL 4527 ZH Sluis, Netherlands will start regular programming soon on 6290 kHz. The power for recent tests was around 6 Watts output but it is planned to operate with a 50 W-rig then. Along with R. Nova (no connection with Nova/Den Haag) is A.J. Beirens of RNI.

R.Batida, a new German station, made a test-broadcast on October 30 on 6239 kHz announcing the following address: c/o Bernd Schröder, Hauptpostlagernd, 3000 Hannover, W.-Germany.

Another new station is the mysterious R.Madison (mysterious, because the name was not clear in RT no.7 ..hi!). R.Madison made their first regular broadcast on October 30 as well and could be heard on 6306 kHz. Their address: R.Madison, c/o Postbus 41, NL 7700 AA Dedemsvaart, NL. It is not clear if this station uses a relay for their service or if they have an own transmitter.

RADIO NOVA

THE MIGHTY 6290

P.O. BOX 85-4527 ZH

SLUIS HOLLAND

Letters sent to the station R.Europa Internazionale (9420 kHz) were returned to their senders with a notice on them that the station is no longer known there.

R.Daytona plans to have a farewell transmission on the 13th November this year somewhere in the 41m band. Time and frequency are not known but it will be a 4 hours transmission, the last chance to tune in to R.Daytona. Their address is: c/o Postbus 10, NL 9540 AA Vlagtwedde, NL

R.Gerona, Postbus 77, NL 8100 AB Raalte, NL won't be on the air in 1983 again because the transmitter will be re-constructed to be used in the 41m band in the future. But probably they will return in late December to celebrate their 3rd birthday ?

BRI or Britain Radio International will be having a new programme-sked very soon, beginning November 27. To inform interested listeners, BRI will have an extra-transmission on Nov 20 lasting only about 15 minutes and starting at 1200 on 6225 kHz giving all the details. The station also has a newsletter issued 6 times a year which you can subscribe for £ 1.05 per year or for SAE + 2 IRCs per one copy at: 32 Victoria Road, Salisbury, Wiltshire SP1 3NG, England.

And now over to France. The new station R.Waves (ref.RT no.5) is proposed to start next weekend, Nov 13. Frequency should be around 7340 kHz and they plan to be on between 0900 and 1200. Transmissions are said to take place every weekend. The following address is not sure : BP 130, F 92504 Rueil-Malmaison Cedex, France.

Free Radio Service Holland (FRSH) will be back Nov 20 via R.Delmare on 6206 kHz with a new programme schedule between 0900 - 1500 which means two hours more than at present (or better: so far). It is almost certain that Daniel Kay will produce the German shows now replacing the current German DJ Michael. Daniel is interested in getting suggestions about the music he shall play in his programmes. You can contact him via: P.I.N., Postfach 220 432, D 5600 Wuppertal 22, West-Germany.

We just received a letter from E.S.T., Electronic Sound Transmission which is operated from Birmingham. Referring to the logs of the past weeks we can hope that the station will be on shortwave more often now, namely once a month as the letter says. The programme usually is a relay of their 50 Watts FM outlet on 94.3 MHz on a 10 Watts SW-rig (the old tx of Empire Radio). On October 30 the SW and FM sites were about 4 miles apart. EST loves to receive reception reports and Dave Cooper certainly likes to verify them. Address: c/o Bx 943, 190 Monument Road, Edgbaston Birmingham 16, B16 8UU, England.

R.48, c/o 32 Vic. Rd.,... had a co-site broadcast with R.Apollo Int'l, c/o P.O.Box 319, Edenbridge, Kent TN8 6QE, U.K. on Nov 6. 48 was on 6240 kHz and Apollo sent out (just from the other side of the field...hi!) on 7330 kHz. R.48 plans to use a new linear amplifier (300 Watts output!) in January next year (more info then) with a transmission containing progs from Dave Scott of Apollo, Toni Rossi (48) and 2 or 3 others. The tx will be a N.-America test and will take place in the early morning.

R.Delmare has introduced 2 new programmes in addition to their regular sked. Firstly, the 'Winners Competition' (WC, hi...!) with Jaques Barelli who also presents the French service on Delmare. Secondly, there's an 'Hour of Gospel and Meditation' in Dutch presented by Johan Neesbach with the address: Postbus 44, Den Haag, Netherlands, a religious programme.

Well, that's it for today and we hope that you enjoyed reading RT ! Don't miss the next deadline which is November 22, 1983. Foreign supporters should send their contributions on Friday or Saturday before the deadline! Thank you and Fight For Free Radio,

22-11-1983

Hi there !

This is RADIOTELEX with its 9th edition. We hope that you are allright and like to read this actual collection of Free Radio information. Well, not many stations could have been logged the last two weeks because of bad reception-conditions, the worst for a long time. Although, a new station has appeared on shortwave (R.Black Hunter, see news) and another young one (R.Batida, see news, too) has had another transmission, a reason to be optimistic for the next time listening to the Free Radio bands. Anyway, keep on supporting RADIOTELEX as we always like to hear from you. We are sure that every Free Radio-mag likes it to hear from FR-fans, so send in your contributions! Thank you!

Reflecting on those letters received, we have had (and hope that we will have in the future..!) a lot of foreign ones. That is of special value for a German magazine because we then have the possibility to look over a wider spectrum of FR. By the way, letters sent from the U.K. took 3 to 4 days to reach us so keep in mind to post your interesting bits this period before the next deadline which is December 6, 1983 !!!

Here are the logs, time is GMT :

12-11-1983

Last time (RT no.8) we had no QSL-corner due to only very few items. However, these items are not forgotten and now, here is a more extended QSL-CORNER

+Station	+kHz	+days	+sent	+received
Electronic Sound Tx	7375	9	SAE	QSL, letter
Mi Amigo R./IRE	6275	62	SAE	QSL, letter
Weekend Music Radio	6240	555	IRC	QSL's, letter, info
Weekend Music Radio	6260	297	IRC	The same, see news !
R.Enterprise/NL	7330	22	2 IRC	QSL-card,2 info-sheets, 2 stickers, pers.letter
R.Apollo Int'l	7330	23	IRC	QSL-card,pers.letter, RT-promo-slips
BRI c/o Danny Kay	6225	85	2 IRC	QSL-card,2 stickers, info-sheets,lots of other info,pers.letter
R.Santana/Neede-NL	7373	58	stamps	card,letter,sticker
R.Batida	7286	11	stamps	card, letter

CORRECTION

In the last edition of RT (no.8) we mixed up the P.O.Box Number of P.I.N., Pirate Info News, another mag from Germany. The right number is: P.O.Box 220 342, D 5600 Wuppertal 22, West-Germany.

The presenter of the Dutch religious programmes of "Christ & Meditatie" is named Johan Maasbach, not Neesbach (RT no.8, last item).

Here is an info on a suspected new OFFSHORE-station. Let's hear more about that...

R.Laser 73 - is a new station suspected to start towards the end of 1983 broadcasting from the Thames-region of the Northsea from a ship called "The Communicator" which now is still under repair in the docks of a Florida-harbour. The ship will be moved to Spain soon where it should be equipped with a 50 kW transmitter and the station should broadcast on 729 kHz after that. It is said that the same people are behind R.Laser 73 as the ones backing R.Caroline.

The next R.Apollo Int'l broadcast will take place on Dec 11 on 7330 kHz. The APOLLODX-programme can be recommended especially. Tune in !

R.Woodstock, former station from Scotland, won't be on the air again after the last raid when OP Luis Nieto was fined £ 100. This second time (the first time he had to pay £ 170) he also lost his equipment. As a result, Luis will not resume "illegal" transmissions due to not running the risk of losing his legal radio amateur's license. Luis gave this info to us on the course of a telephone-chat when he operated a phone-in service for R.Lynda. As we think that Lynda also will use this number in future phone-in's, here it is: U.K.-code - 0324 - 38710.

Staying in Scotland, Weekend Music Radio now answers all reception-reports received the last 2 years and, of course, will love to hear from you in the future ! As Jack Russel wrote, tests to North America will take place soon. Here are the dates: On 6260 and 6235 (or 6280) kHz on 27-11-1983 between 0200 and 0800 GMT. Other dates are: 11-12-, 8-1-84, 29-1-84, 12-2-84 and 26-2-84 between 0500 and 0800 GMT (note the different timing !). He also promised new info-sheets with an up to date history of WMR ! Here is their address again: c/o 42 Arran Close, Cambridge, U.K.

WEEKEND MUSIC RADIO

The next Voice of the Leek from Wales is planned for January 1984 taking place as a test to North America.

R.Enterprise from the Netherlands has changed its address to Postbus 19074, NL 3501 DB Utrecht, NL. This change was necessary due to the new PO Box numbers given by the Dutch Post Office.

According to an info received from Mi Amigo R.Int'l from Ireland, they changed their frequency to 6245 kHz now and ask for reports. Address is: North Street, Swords, Co.Dublin, Republic of Ireland.

A new TELECOM-law should be passed in the U.K. in 1984 saying that it will be illegal to provide an address for a Free Radio station. Bad times?

According to R.Victoria, a mobile station is planned in the GDR called "R.DDR Int'l". They should operate on 41 metres with a power between 6 or 8 Watts. No address is known yet.

R.Nova/Dublin plans to operate in the Greater London-area on mediumwave - as a pirate! These plans arose because of the great popularity R.Jackie and R.Sovereign have. The new service should operate 24h a day.

ANZEIGE -- ADVERTISEMENT -- ANZEIGE -- ADVERTISEMENT -- ANZEIGE -- ADVERT

BBMS, Britains Better Music Station, c/o 185 Fleet Street, London EC4, U.K. sucht einen neuen DJ für die deutschsprachigen Programme. Musikrichtung: oldies. Wer hat Lust ?

R.Waves, new station from France, has been heard in South England on Nov 13 on 6250 kHz. Does anybody know more about this ? (ref. RT no.8)

Radio Black Hunter, Postbus 36, Gaanderen, NL transmitted for the first time on shortwave Nov 20. The frequency drifted more than 7 kHz in 35 minutes - I presume they use a VFO (variable frequency oscillator). The modulation was loud and clear. The station is known from the medium-wave.

R.Milano Int'l, Via Locatelli 6, I 20124 Milano, Italy plans to get a P.O.Box in Milan to solve problems with R.Victoria. Just to remind you: The programme-tapes seldom reach the station in time. On the other hand, the R.Victoria-pressrelease no. 10 says that they found a friendly truck-driver who will take the tapes to R.Milano directly - in one day.

Radio Avalanche, c/o 32 Victoria Road, Salisbury, Wiltshire SP1 3NG, U.K. hopes to be back again before Christmas '83. Their 1st birthday prog on Sept 11 was according to them a great success with more than 50 letters received including 3 from Finland.

R.Batida replies with a nice QSL-card together with a long letter telling more about the station and their equipment. They use a transmitter with an output power of app. 40 Watts. The antenna is a 18m longwire in a height of 7.5m. The DJ's are calling themselves Bernd, Tilo and Michael and the station now also has stickers (green, see beneath !). . . They can be contacted at :
c/o Bernd Schröder, Hauptpostlagernd, 3000 Hannover, West-Germany.
The station mostly plays Reggae-music and has been heard with a quite fair signal on Nov 20 operating on around 6238 kHz. R.Batida formerly operated on mediumwave.

R.Santana (ref.RT no.8), Postbus 46, NL 7160 AA Neede, NL transmitting from Rietmolen began its transmissions in the 41m band in 1983 and has nothing to do with R.Santana on 6200 kHz ! Technical info: oscillator 6V6, driver 6L6, PA 2x 207 tubes. The antenna is a half-wave longwire (10m) installed in a height of 8m. The studio contains a Philips 212 electronic turntable and an Akai 4000 DS MK2 tape-recorder. The modulation-amplifier is fitted with 2 EL 34 valves. They also operate on FM 100 - 104 MHz.

R.Clash, station operated by Scottish Disco-DJ's and most probably operating via the transmitter of R.Stella has been heard Nov 20 on 6305 kHz. The sked is as follows: 1st and 3rd Sunday R.Clash, 2nd and 4th Sunday R.Stella. By the way, R.Stella from now on will operate on 6235 kHz and they have a new address. PLEASE: Put Jock Wilson on the envelope, not R.Stella! c/o 235 Rullion Road, Penicuik, Midlothian, Scotland.

World Music Radio, P.O.Box 4078, Amsterdam, NL can be heard from Northern Italy via the following stations:

R.Milano Int'l FM 101 MHz + AM 1300 kHz

Pavia Radio City (PRC) FM 101.6 MHz

91-Radio FM 91 MHz

According to a station-info WMR also broadcasts via RMI on SW 7295 kHz. However, nothing has been heard there so far. Programmes are heard from time to time via R.Dublin on 6910 kHz.

Radio Benelux, the Free and local FM-station for East Belgium, has changed their frequency now to 103.3 MHz (ex 101.2 MHz) where they are heard 24 hours a day. Address: BNL, c/o Andre Göbbels, Postbus 10, B 4700 Eupen, Belgium.

When writing to R.Eastcoast Commercial, the address 32 Vic. Rd.,... is quicker than the other address they use, P.O.Box 319, Edenbridge, Kent TN8 6QE, U.K. Of course, ECC is allowed to use RADIOTELEX-info provided credit is given to RT. Thank you also for putting the promo out so often !

Well, that takes us to the end of RT no.9 ! Keep writing! 73 + FFFR, RT

DEADLINE FOR RT NO. 10 : DECEMBER 6, 1983

All material of RADIOTELEX may be used by other magazines or in DX-programmes, provided RADIOTELEX is mentioned. Thank you anyway !

6-12-1983

Hi there !

How are you ? I hope you're fine and ready to read another edition of RADIOTELEX, the fortnightly Free Radio bulletin - the latest on F R ! Letters and other contributions were numerous as ever and a special THANK YOU goes to KLA-Radio in the U.K. who sent us the following 'Christmas-QSL' - I'll give it over to you right now:

KLA-Radio is the first station I'll mention in this issue. They plan to be on Dec 25, Christmas Day, beginning at 0900 GMT (quite early !) and I presume they will be on usual 7334 kHz in the 41m-band. Address is : c/o 16 Windmill Lane, Long Ditton Surrey, U.K. Thanks again, KLA, for sending the 'QSL', hi !

Talking of Christmas Day, we actually would like to know of as many stations as possible if they will be on Dec 25 and when. As you might have already noticed, RADIOTELEX no. 11 will

be out just before Christmas, exactly on Dec 20, 1983 ! We then will do our very best and release no. 11 the same night (taking it to the main Post Office of Bremen) so that you will be able to listen out to many stations over Christmas and, most important, you will know 100 % what station you listened to - just looking it up in RT ! We ask all FR-stations again to send us their Christmas and New Year schedule ! It will be issued in RT !

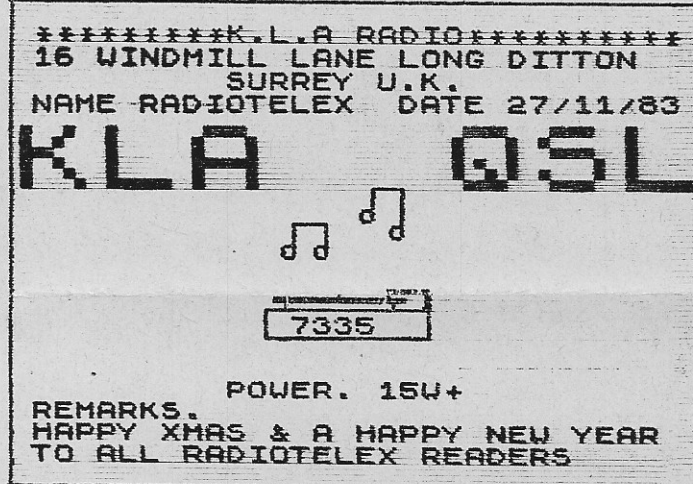

Here are the current loggings, time is GMT !

QSL-corner

+Station	+kHz	+days	+sent	+received
R.Batida	6238	10-30	SAE/IRC	QSL-card, letter, sticker
Electronic Sound Tx	7350	10	SAE	QSL, letter, info
R.Pacific	6310	21	IRC	QSL-letter
Mi Amigo R./IRE	6275	78	2 IRC	QSL-letter
WLS	6223	35	2 IRC	QSL, info
Channel Radio	6199	10	2 IRC	QSL, letter
R.Nova/Sluis-NL	6287	133	2 IRC	QSL, letter, sticker

The reason for us to print the R.Batida-QSL, see beneath, is that :

a) it is a very good QSL (quality!)

b) R.Batida now uses the RT-address-service !!

As they had problems with their former address, they now can be contacted at: RB, c/o Postfach 700 825,

D 2820 Bremen 75, West-Germ.

Radio Batida made a trans-

mission on Nov 16 (holiday in Germany) on 7286kHz and unfortunately did not receive all the letters sent to the 'Bernd Schröder-address'. Also reports for Nov 20 can be send again using the new address!!

QSL

*Radio
Batida*

BRI, Britain Radio International, has introduced their new schedule as planned on Nov 27. The main changes are: Chris James and Sarah have left the station while Norman Nelson joined BRI to present the rock-shows. The German service is now on the air every 4th Sunday of the month at 0930 GMT. A Dutch programme is planned as well. So, anyone interested in presenting that show should write to BRI at once ! Next programmes are planned for: Dec 10 : test to NAmerica 0630 on 6225 or 6260 kHz, Dec 18 extra prog on 6225 kHz, Dec 26 special BRI-CHRISTMAS-PARTY, Jan 8 test to NA at 0630 on either 6225 or 6260 kHz. Their address is c/o 32 Victoria Road, Salisbury, Wiltshire SP1 3NG, U.K.

The Satellite Broadcasting Company, c/o Postbus 41, NL 7700 AA Dedemsvaart, Holland was first heard Nov 27 on 7317 kHz with programmes in German hosted by the DJ's Michael and Herbie. They mostly play Disco and Funk-music, the prog was relayed by R. ECC.

R.Clash (ref. RT no.9) who shares transmitter with R.Stella can be contacted at 32 Victoria Road,...

According to Phil Abbot R.Lynda was raided Nov 13 at 1200 GMT by the Home Office when John Dean operated his station on 41 metres. They confiscated 1 transmitter but John hopes to be back soon with reduced power on his 'favourite' frequency 6230 kHz. The raid is said to have taken due to interference R.Lynda caused to CHU, a Canadian time signal station which is stupid, obviously, because R.Lynda was heard on 7325 kHz while CHU operates on 7335 kHz. The H.O.-men said that this raid was the beginning of a series of confiscations affecting shortwave-stations. I remember that those people said this before when raiding Norman Nelson's Eastcoast Commercial...

Another raid took place at the site of Radio Black Fox alias Alpha 2 (QSO-name) on Sept 26 regrettably. All the best to Kenny Stone !

Howard Bell of R.48 said that the PA for his 'marathon-transmission' in January 84 (300 Watts) still is in pieces at the moment, hi ! Also the modulator (500 Watts) is still not build and Howard said that he needs a fork lift truck to carry the whole out of his garage... but he hopes to have it ready before the new TELECOM-BILL is out?!!... He'll be on the air again with 20 Watts near Christmas.

Ex-R.Quadro-DJ George Strong has done a show for Scandinavian Free Radio which will go out on 41 metres at Xmas. Their address is c/o 32,...

Also R.Madison c/o Postbus 41, Dedemsvaart,... plans to be on Christmas 25-12.

Atlanta Radio an 'old favourite' as some call it returned on Nov 27 on 6290 kHz after more than 18 months of absence..The station was requesting reports for this transmisson for which they 'd send their QSL-card and an info-sheet. DJ's were: Mark Stafford, Tim Stewart and Phil Collins. Atlanta can be contacted at: c/o P.O.Box 319, Edenbridge,Kent TN8 6QE, U.K. Unfortunately, this is said to have been a single test only !!!

R.49 Int'l, c/o 3 Rosewarne Cottages, Rosewarne Downs, Nr.Camborne, Cornwall TR14 OBE, U.K. will soon start a German service to be transmitted on Saturdays via R.Delmare on 6206 kHz. Reports and letters are most welcome at the above address ! Tune in !!

BBMS has not been heard the last time because their power-supplies have blown up on Nov 19. BBMS now looks for an engineer who could solve the problem and helps the station to return to the air. Their address is c/o 185 Fleet Street, London EC 4, U.K.

R.Apollo will only be on the air Dec 11 in case the Dutch, German, and Disco-shows arrive in time. At the moment, Dave Scott only has a Phil Abbot-guest-tape together with an up-to-date APOLLODX prog available. He also received tapes for a relay from R.Sunday and R.Pacific but those were in such a horrible condition that he returned them saying: SORRY.

Sunrise Radio will transmit a special Christmas show on Dec 25 on old 11415 kHz in the 26m band starting at 0900 GMT. Reports and letters are welcome at Postbus 41, Dedemsvaart,... They plan to be on the air in 1984 every 1st Sunday of the month with progs starting at 1000 and lasting 1 hour.

R.Jackie (ex 227m - 1323 kHz) changed now to the old BBC R.Bristol-frequency 1584 kHz to avoid interference with R.Bristol that changed to 227m!

It seems that there is something true about the new OFFSHORE-station. One contributor sent in the following slip taken from the MELODY MAKER (26 November 1983):

NEW POP PIRATE TO JOIN RADIO CAROLINE SOON

RADIO CAROLINE, the continuous pop pirate radio station, could shortly have a competitor.

There are strong rumours that a new pirate ship has left Fort

Lauderdale in Florida and is due to anchor alongside Radio Caroline's vessel, The Ross Revenge, 18 miles off the British coast.

The new station, which will be called Laser 730, is

American backed and will specialise in Top 40 material, as opposed to Caroline's heavy album format. Laser 730 has a 354 ft high mast and is hoping to achieve a power of 100 kW.

Caroline, which has been broadcasting to Britain and Europe since August this year and has recently increased its programming to 24 hours a day, is to take on advertising shortly.

Another info taken off the DAILY TELEGRAPH of Nov 17 reported on the momentary 'pirate-situation' in the U.K. It said that there are 31 stations broadcasting regularly and that this has brought complaints from Capital Radio and the IBA. Of course, the example for a pirate was R.Enoch, political right-wing station which, obviously, has nothing to do with 99% of the 'typical' pop-pirates...

R.Eastcoast Commercial has a DX-prog called ECC-DX which is broadcasted every 1st Saturday on 7317 kHz and every 2nd Saturday on 11584 kHz

Well, that exhausts my information-stock for this time. Please remember our next DEADLINE, DECEMBER 20 !!! Send in your news and letters 4-5 days before to make sure they reach us in time !

ATTENTION: The information contained in RADIOTELEX is free to other FR-magazines and DX-programmes provided credit is given to RADIOTELEX !!!

All the best and bye for now !

73, FFFR

20-12-1983

Hi....,

sorry, but we have good reason for being not too optimistic concerning the future in Free Radio. Of course, RADIOTELEX will do the very best to keep you informed but it is widely thought (e.g. by Neal West of ECC-DX to name just one....) that bad times had begun on the FR-sector. Writing of this, here is our first news-clip :

The op's of the 32 Victoria Road-address have recently been visited by the authorities and it is now uncertain whether this address will ever be available for Free Radio-stations in the future. 2 stations especially mentioned by the officials were Britain Radio Int'l (BRI) and R.Avalanche - they use this address... also R.Eastcoast Commercial (ECC) who started to use this address additionally to their P.O.Box 319,...-contact now fears complications and immediately cancelled both addresses as connection between station and listeners ! Please note that you cannot contact ECC any longer ! The right place to offer the RADIOTELEX-address-service to that popular station. We ask Neal West to inform us about that, O.K.? We all have to keep Free Radio alive !

More about things connected with that later on in this issue !
Here are the recent loggings, time is GMT, as ever !

 UP-DATER **Regarding the log of Dec 4, 1983 in RT no. 10, WLS,
 the World Listening Service was on 6225. They now use
 a new address (as stated there...) which is 70 Bale Road (or Lane !),
 Leicester, U.K.

**The UNID on 7349 kHz the same day was IDd as EST, Electronic Sound Trans-
 mission. They still use a radio-FM-link which results in low modulation.

The QSL-corner has to wait 3 or 4 minutes now because here is a really
 amazing advert....probably the CHRISTMAS-present for you (or your
 friends ?):

**HAVE YOU EVER THOUGHT ABOUT STARTING YOUR OWN RADIO STATION ???

Well, now the opportunity is here... APOLLO ENGINEERING SERVICES can
 make you a transmitter, built to your own requirements, at prices you'd
 find hard to better anywhere !

We can build transmitters for use on any frequency on SW, MW or FM, as
 well as supplying crystals and antennas.

With our SW-transmitters, you can use them to operate on 2 adjacent
 bands (i.e. 6&7 MHz, 7&9 MHz, etc...) (although not at the same time !).
 The MW and FM rigs are set for one frequency and changes in frequency
 need technical adjustments (our engineer provides an excellent after
 sales service, too).

Approximate Prices

*20 Watt tx (usable from battery or mains).....	£ 65
*30 " " " " " " " "	£ 80
*40 " " (SW-mains only, MW/FM either).....	£ 100
*50 " " " " " " " "	£ 110
*100 " " (mains only)	£ 200

(higher power transmitters can be build)

Inverters (needed with all tx's) are available at £ 15 extra.

Antennas (SW half wave dipoles etc...) start at £ 15.

Crystals range from 50p to £3 depending on type.

If you're interested or would like to know more contact Chris Evans
 (Chief Engineer), R. Apollo Int'l, P.O. Box 319, Edenbridge, Kent TN8 6QE,
 U.K. It's worth trying !

(Available within the U.K. only)

Quite interesting, isn't it ? Well, here's the QSL-CORNER :

+Station	+kHz	+days	+sent	+received
R.Avalanche Int'l	7317	59	2 IRC	QSL-card, info-sheet pers. letter, stickers
R.Caroline Int'l	6311	10	2 IRC	QSL-letter
Coast Sound R.	6240	79	2 IRC	QSL-card, pers. ltr, 2 stickers, LS- promo-slip
R.WBI/Delta	7323	27	2 IRC	QSL-card (Delta), QSL-letter (WBI), info, pers. letter
KLA-Radio	7334	17	2 IRC	little QSL-card, pers. letter
R.Victoria	7295	5	stamps	QSL-card, pers. ltr, sticker
R.Milano Int'l	7295	90	2 IRC	QSL-info-ltr, sticker current RMI-charts
FRSHolland	6205	53	2 IRC	2 QSL-cards, pers. letter
R.Black Hunter	6239	17+28	SAE	2 QSL-info-letters
Atlanta R.Int'l	6290	22	SAE	card, letter, info

Back to R.Eastcoast Commercial. This station made two information-broadcasts on Dec 11 on 6226 kHz giving the following information:

- ECC appologizes for the fact that there's been no transmission on 26m Dec 10 and that there won't be a programme Dec 17.
- ECC has no longer a mailing address (see before !). Listeners are asked NOT to send in reports and letters anymore to the addresses ECC used so far !!!
- BRI won't be on the air Dec 18 due to the facts stated earlier in this issue !

Sunshine Radio from Shropshire appeared in court on Thursday, Dec 8 and has been found guilty. The station-operator James Harding appearing under his real name Graham Symonds was fined £ 550 including court costs and it was also ordered by the court that the 220 W-Sunshine tx has to be destroyed. But no sooner was that removed by the authorities when a new tx was installed and Sunshine stayed on the air- on 1017 kHz. Symonds claimed that he had no idea who installed it and British Telecom said that they will not raid this new tx unless ordered to do so by the government....A new transmitter of 500 W has just been completed and when installed they may move to 1026 kHz...

Radio CLCG, the station of the Clandestine Listener's Club Germany (P.O.Box 540 101, D 4100 Duisburg 11, West-Germany) was on the air Dec 4 for one hour starting at 1100 GMT via Music Radio Holland on 7313 kHz. The next programme should be aired January 1, 1984 again via MRH starting at 1100 GMT.

There are also plans to broadcast via Grüne Spekt Radio on 1638 kHz MW or, if there's QRM, on 1610 or 1625 kHz. Transmitting times will be: 0000 - 0200 GMT on Jan 15, 1984.

R.49 Int'l, c/o 3 Rosewarne Cottages, Rosewarne Downs, Nr.Camborne, Cornwall TR14 0BE, U.K. will soon have a relay on 6230 kHz. The station also hopes to be on the air soon with an own transmitter of about 10 W of power. Talking of R.49, here is an advertisement concerning the

***GERMAN SERVICE OF R.49:**

The G.-service of R.49 is looking for recordings of SW-Free Radio stations. If you have one or more recordings older than 1 year contact us via the RADIOTELEX-address. Return postage isn't necessary ! Write to 49-G, c/o P.O.Box 700 825, D 2820 Bremen 75, West-Germany.

World Music Radio, P.O. Box 4078, Amsterdam, NL, is no longer broadcasting via R.Milano Int'l in Italy because WMR was not satisfied with the results of the programmes via RMI and it is said that it's been too expensive...

In the meantime, AWR, Adventist World Radio is testing via RMI's tx's: After the R.Victoria progs and also between 1700 and 2000 GMT on 7265, 7190, 7145 and 7165 kHz.

R.Diana, Postbus 41, NL 7700 AA Dedemsvaart, NL now verifies reception reports with a very special Lady Di/Prince Charles-QSL-card (we will print that when our ed gets his copy...hi !) as well as with a nice letter of OP Bruce Mike who said that the last transmission was only on the power of 8 W (!!-ed).

The X-mas schedules (as far as known!)

Dec 25: -KLA Radio/7334, 0900; -R.Madison/48m,--; -Weekend Mx R./48m, many

Dec 26: -Sunrise R./11415, 0900; -BRI/6225,--; R.Kristel/6230, early

Dec 27: -R.Apollo spec.tx/7330(probably), 0900

Other stations to be expected are R.Avalanche(relay), R.48 and relays via the Dutch station R.Hotel Amigo (41m).

R.Freedom's signals made it over to the USA (Massachusetts) Nov 6 via their frequency 15040 kHz at 1121 GMT !! The signal was that strong that the DX-er thought it must have been a relay ! Freedom is also on regularly on 6230 kHz and can be contacted at: Department R, 67 Elm Row, Edinburgh EH7 4AQ, Scotland.

The Voice of the Leek, Wales only pirate on SW, will be having a test-transmission in January between 0600 and 0730 to North America followed by a European transmission between 1000 and 1130 GMT. Exact date and frequency will be announced when help in choosing the best frequency has been given by American DX-ers. VOTL still uses the Edenbridge-address

Nearly all of you will have found a SAE-service ordersheet. Try it and you'll see your QSL's and other letters pouring into your mailbox ! Apart from that, you save money (yours and that of the FR-station !). People in Finland, Sweden, Norway, Denmark and Belgium have to write in for special conditions !

Another offer of RADIOTELEX is the RT-ADDRESS-SERVICE. Write also in for that - you'll quickly find you're FR-station fitted with an address ! Stations already using this service are:

R.Batida (RB) and R.49 (only for the special action described on page3 !)
(49-G). Also another FR-magazine uses our address: LS, Lautsprecher.

Atlanta Radio who recently made a comeback on 6290 kHz plans to be on in a few weeks time (perhaps even at Christmas ??). The transmitter they use is not the old Atlanta-rig but the device used by ABC Radio in 1980. Their antenna is a normal half wave dipole and the main valve is the famous 807. The excellent modulation is obtained by compressing the audio signal during the recording and cutting the bass frequencies.

And that completes today's information. Your letters and news are always welcome. Special thanks this time to Dave Scott of APOLLODX and Neal West of ECC-DX as well as to the regular "staff" ! Note that any FR-station or magazine is allowed to use the information contained in RADIOTELEX but we think it is just fair to mention us as well ! Next DEADLINE is January 3, 1984 (no.12).

Bye for now, FFFR - RADIOTELEX HAVE A NICE CHRISTMAS AND A HAPPY
